Product Engineering

THE McGRAW-HILL MAGAZINE OF DESIGN ENGINEERING

FIVE DOLLARS A YEAR

INDEX-1956

Volume 27

January to December

INCLUDING PRODUCT DESIGN DIGEST ISSUE FOR 1956

McGraw-Hill Publishing Company, Inc.
330 West 42nd Street, New York 36, N. Y.

— A —

Actuators, Hydraulic
Hydraulic drive replaces air motor (PD) ....July 160
Locking mechanisms for hydraulic actuators. R. A. Chace....June 164

Adhesives
Cement in coils (D)....Oct. 5

Aeronautics
Flight safety aspects of electrical design (A) ....Nov. 364
Guided missiles (P)....May 129
Rocket and satellite studies (P)..Jan. 129
Search for rocket engines (N)....June 204
Simplified automatic navigator (N) Aug. 209
Smaller oil pressure measuring system (D) ....Aug. 5
Testing guided missile control systems. D. E. Mullen ....Mar. 199

Applied Mechanics
Calculating damping factors for dashpot dampers ....Apr. 162
Calculating mass moments of inertia. Kloomok & Muffley (RS)....Jan. 215
Calculating time lag of hydraulic and pneumatic valves. Louis Dodge.June 158
Centrifugal pendulum design. Linn & Wenig ....July 164
Collapsing pressures of non-symmetrical bodies. Melvin Mark....Oct. 165
Column formulas—four basic types. G. H. Howell ....Apr. 139
Damping factor calculations. B. J. Popper ....Nov. 199
Design of cam followers. Kloomok & Muffley ....Sept. 197
Designing strain gage circuits for sensitivity and linearity. P. K. Stein July 144
Determining oscillatory accelerations. J. F. Sodaro....Jan. 221
Driving high-inertia loads. C. C. Libby Apr. 142
Force - speed - horsepower nomograph. Leo Fiderer (RS)....Oct. 219
G loading of rotating bodies. Carl Nachod (RS) ....Mar. 219
Graphical method for shoe brake design. R. O. Kroeger....Mar. 142
Graphical solutions for two failure theories. Burton Paul....Mar. 178
Influence of gyroscopic principles on design. R. P. Nagorski....Aug. 183
Minimum cam size as determined by pressure angle. A. E. Sanderson..July 141
Minimum inertia in geared drives. M. A. Baer....Jan. 186
Plate cam design . . . evaluating dynamic loads. Kloomok & Muffley.Jan. 178
Radius of curvature of parabolic cams. Rudolph Gruenberg (RS)....Aug. 219
Random motion. G. B. Booth....Nov. 169
Speed-torque analysis for rotating mechanical systems. V. H. Seliger Dec. 184
Stresses in perforated panels. Dally & Durelli ....Mar. 188
Surface curvature. Ernest Wildhaber May 184
Wear life of aluminum gears. A. H. Maschmeyer ....Sept. 160

Assembly
Assembly machine engineered for quick changeover (PD) ....Jan. 172
Automation for short run production June 205
Lapped joint compensates for tolerances in welded frame (PD)....Dec. 166
Squeeze riveter assembles 3 parts (PD) Oct. 149

Atomics
Characteristics of nuclear reactors May 138
First private nuclear research center (N) ....Dec. 194
Nuclear field is expensive (P)....Nov. 129
Nuclear reactors pose new problems in mechanical design—report ..Apr. 187
Report on peaceful uses of atomic energy released (N)....Mar. 203
Automation (A) ....Feb. 335

Automotive
Air conditioning in basic car design (PD) ....Mar. 154
Air cushion supports rear springs (PD) Dec. 158
Air-filled suspension system ready for 1956 trucks (N)....Feb. 206
All aluminum transport (PD)....Feb. 152
Electric push button control and non-slip differential (PD)....Mar. 152
Finished-forged gear teeth now used in German autos. O. Rieckhoff..May 180
Finned brake (PD)....Mar. 153
Gasoline injection system ready for automobiles (N) ....Jan. 205
GM's Firebird II points to car of future (N) ....Feb. 211
High torque engine, dual clutch and hydraulic controls give tractor more utility (PD) ....July 150
Hydraulic clutch and ball joint suspension in English car (PD)....Nov. 156
Hydraulic controls for carrier and dozer (PD) ....Mar. 157
L. P. G. carburetor injects both liquid and gas (PD)....Nov. 159
Lift truck has sectional transmission (PD) ....May 156
Magnesium castings contribute to directional stability of Volkswagen (PD) ....Jan. 160
Magnesium truck light and rigid (PD) Feb. 152
1957 cars (N)....Nov. 206
Omega engine—automotive engine changes shape (N)....Apr. 211
Pneumatic springing (PD)....Mar. 156
Power lubrication extends car life (PD) ....Mar. 148
Reinforced plastic makes rigid truck grill (PD) ....Dec. 160
Rubber isolation decreases shocks transmitted to frame (PD)....Nov. 152
Separate track drives make tractor maneuverable (PD) ....Nov. 148
Stressed plastic panels reduce trailer weight (PD) ....Sept. 153
Transmission friction elements reduced, power braking improved (PD) Mar. 150
Two-cylinder, two-cycle, low-price German car has fuel injection (N) Dec. 191
Walk away from a 50 mph head-on collision (N) ....Nov. 210
Wheel suspension has fewer parts, less weight (PD) ....Dec. 159

— B —

Bearings
Air bearing levels dividing table (PD) Apr. 156
Ball-bearing remote control (C)..June 223
Bearings for 600 F water lubrication (D) ....Jan. 5
Bearings set in rocking saw frame (PD) ....July 156
Bearings without lubrication (D)..July 5
High temperature bearing operation (A) ....Nov. 372
Prelubricated ball bearings use felt pads (N) ....May 205
Real oil-less, self-lubricating bearing metal (D) ....Dec. 9
Rotor unbalance adjusted by floating bearings (PD) ....Feb. 147
Testing dynamically loaded bearings (A) ....Dec. 345
Unusual applications of miniature bearings. R. H. Carter (MS)....Nov. 184
Why bearings fail. Wilcox & Booser Oct. 167

Belt Drives
Timing belts drive wire rolling mill (PD) ....Sept. 158

Brakes, Mechanical
Disc brake for fluid coupling motor (C) ....June 222
Finned brake (PD)....Mar. 153
Graphical method for shoe brake design. R. O. Kroeger....Mar. 142
Silicone shoes for brakes. A. P. Battick Dec. 172
Torque tester uses hysteresis brake (PD) ....June 152
Transmission friction elements reduced, power braking improved (PD) Mar. 150

Brazing
Production facility for vacuum brazing (D) ....June 5
Selecting brazing alloys. R. A. Long Sept. 191
Self-fluxing brazing alloys for ferrous metals ....Jan. 204
Silver brazing. A. W. Swift....Mar. 135
Silver brazing alloys in expanded strip form (C) ....Aug. 227

— C —

Cams
Cam mechanism reduces lost motion (PD) ....Feb. 157
Cam sets temperature in steam iron (PD) ....Nov. 161
Cams sequence pump motions (PD) Oct. 154
Design of cam followers. Kloomok & Muffley ....Sept. 197
Minimum cam size as determined by pressure angle. A. E. Sanderson July 141
Plate cam design . . . evaluating dynamic loads. Kloomok & Muffley Jan. 178

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.

Radius of curvature of parabolic cams. Rudolph Gruenberg (RS) .....Aug. 219

Casting

Casting crankshafts (D).....May 5
Casting design. Berhard Rogge....Oct. 190
Designed for die casting—4 case histories (PD) .....Apr. 152
Designing for investment casting. J. E. Srawley .....Apr. 166
Die casting forms saw frame (PD) Oct. 152
Getting forging strength in a casting (D) .....Nov. 9
Magnesium castings contribute to directional stability of Volkswagen (PD) .....Jan. 160
Materials for casting subject to abrasion and corrosion (A).....Aug. 366
Redesign for die castings. J. J. Punke .....Jan. 156
Correction .....Feb. 163
Stainless steel threads cast in cast iron (D) .....Oct. 5
Time clock frame. R. I. Travis....Feb. 163

Ceramics

Ceramic magnets. R. A. Scholten..Dec. 143
Development of cermets as structural materials (A) .....Feb. 340
Low cost ceramic permanent magnets (D) .....Apr. 5

Chain Drives

Bead chains for light service. Bernard Wasko (MS) .....May 192
Lubrication of roller chains (MS).July 192

Clutches, Mechanical

Clutch disconnects rotor to stop motor (PD) .....Sept. 156
Fast acting magnetic clutch. Tompkins & Edgar .....Aug. 145
Plastic clutch cone resists heat (PD) Feb. 157

Compressors

Fan cooling—influence of altitude. J. Constant van Rijn .....June 198

Computers:

Automatic miller has simplified programming (N) .....July 203
Computing mechanisms (MS) I Mar 200, II Apr. 180
Connect two computers to share single problem (N) .....May 205
Slope reader for data reduction (C) Feb. 225

Connectors, Electrical

Electrical terminal connections. Frederico Strasser (MS) .....Dec. 182

Control Systems

Automatic temperature controls. R. H. Matthews .....Sept. 179
Calculating time response of a system to an arbitrary input (A).....Mar. 396
Driver-less automatic transfer system (PD) .....May 160
Electric push button control and non-slip differential (PD) .....Mar. 152
Electrohydraulics in machine tools. A. Durr Pt II Applications.....Jan. 188
Monitor checks self in new fail-safe system (N) .....Apr. 213
Remote controls for embroidery machine (PD) .....Apr. 158
Servo pump vs servo valve controls (A) .....May 412
Speed control for Fhp drives (C)..Oct. 221
Testing guided missile control systems. D. E. Mullen .....Mar. 199

Control Systems, Hydraulic

Boring operation improved through hydraulic controls (PD).....Feb. 148
Electro-hydraulic press control programs extrusion cycle (PD).....Oct. 144
Functional design of hydraulic systems. Stewart & Moritz.....July 171
Hydraulic control of speed and inertia. Johnson & Bjorklund .....Sept. 140
Hydraulic control techniques for heavy presses (A) .....Feb. 344
Hydraulic control valves I—Relief valves. J. J. Pippenger.....Dec. 174
Hydraulic controls for carrier and dozer (PD) .....Mar. 157
Hydraulic crane (PD).....Apr. 148
Hydraulic leveling (PD).....Aug. 150
Hydraulic power package disconnects from system (PD).....Sept. 154
Hydraulically controlled 6-spindle grinder (PD) .....Mar. 160
Industrial rotating hydraulic drives (A) .....Jan. 359
Level controls hydraulic truck (PD) July 158
United control system cycles tracing lathe (PD) .....Dec. 164

Corrosion

Aluminum joint corrosion is avoided (D) .....May 5
Chromizing for resistance to corrosion and wear. Lehane & Wachtell..Nov. 180
Corrosion of dissimilar metals. Evans & Rance .....Dec. 187
Corrosion of metals by plastics (D) Sept. 5
Corrosion resistance of stainless thread inserts in light alloys. P. E. Wolfe Apr. 176
Corrosion resistance of titanium. A. N. Eshman .....June 187
Organic corrosion (A).....Apr. 399
Process prevents corrosion of aluminum bus bar joints (N).....May 205
Resistance of materials to mechanical corrosion. R. W. Henke.....Jan. 194
Resistance to corrosion of Al-Cu and Al-Cu-Cd alloys (A).....Oct. 380
Resistance to corrosion of sheet Mg-Li alloys (A) .....Oct. 376
Stainless steel for corrosion resistant service (A) .....Aug. 370
Stress-corrosion of 18-8 (A).....Aug. 367
Why bearings fail. Wilcock & Booser Oct. 167

Cylinders, Hydraulic

Hydraulic leveling (PD).....Aug. 150
Locking mechanisms for hydraulic actuators. R. A. Chace.....June 164
Series connection synchronizes hydraulic cylinder (PD).....Oct. 156

—D—

Design

Air bearing levels dividing table (PD) Apr. 156
Air conditioning in basic car design (PD) .....Mar. 154
Assembly machine engineered for quick changeover (PD) .....Jan. 172
Balancer operates to 200,000 rpm (PD) June 148
Ball-supported washing machine (PD) June 154
Battery-operated timing motor uses clock movement (C).....Dec. 216
Cam mechanism reduces lost motion (PD) .....Feb. 157
Camera stand—low-friction, no-play mechanisms maintain precision (PD) Jan. 164
Case-less lantern (PD).....May 161
Casting design. Bernhard Rogge..Oct. 190
Centrifugal pendulum design. Linn & Wenig .....July 164
Change-making machine handles paper currency (N) .....July 208
Circuit breaker redesigned for less space (PD) .....May 152
Constant modulus springs stabilize mass flowmeter (PD).....Oct. 156
Constant velocity universal joint permits packaged test facility (PD) Jan. 167
Convertible mill (PD).....June 156
Countersinks in thin plates. Mark Levine (RS) .....Feb. 219
Creep tester makes three basic tests (PD) .....July 162
Designing beams for shock and vibration. J. J. Herley Jr. (RS).....Nov. 221
Designing composite members. R. J. Auman .....June 140
Designing screw machine parts. A. E. Theroux (MS) .....June 192
Designing strain gage circuits for sensitivity and linearity. P. K. Stein July 144
Die casting design—4 case histories (PD) .....Apr. 152
Evolution of an engine (PD).....Feb. 150
Functional design of hydraulic systems. Stewart & Moritz.....July 171
Gas cycle refrigerating machine makes liquid air (PD) .....Oct. 150
Germany's amazing comeback. G. F. Nordenholt .....Jan. 135
High strength steel key factor in design of world's largest shovel (PD) May 148
Hoist packaged into compact, low cost unit (PD) .....Feb. 154
Hydraulic drive replaces air motor (PD) .....July 160
Hydraulic pressure atomizes paint (PD) .....June 144
Hydroplanes: future ocean liners? (N) May 204
Increasing compressor speed makes possible reduction in size and weight (PD) .....Dec. 154
Influence of gyroscopic principles on design. R. P. Nagorski.....Aug. 183
Innovation or design improvement (Ed) Feb. 133
Investment casting designing. J. E. Srawley .....Apr. 166
Level controls hydraulic truck (PD) July 158
Machine packs 4,000,000 leaflets a day (PD) .....Feb. 144
Manipulator redesigned for production (PD) .....June 150
Mechanical comparator (PD).....Apr. *161
Mechanical problems in miniaturizing potentiometers. E. W. Drewitz..Aug. 141
Modular design timer (C).....Dec. 217
Motor driven micrometer (PD)..June 153
Multi-color printing automat (D).Nov. 9
Multiple-function power tool (PD) May 156
Neg'ator spring motor in camera (PD) Mar. 161
Noise control. Smith Jr. & Junger Nov. 143
Nuclear reactors pose new problems in mechanical design—report...Apr. 187
Oil reservoir design symposium...Mar. 166
The open mind contradicts (ED)..Oct. 133
Packaging machine fills 1050 cans per minute (PD) .....Aug. 146
Photo-electric servo indexes commutator (PD) .....Nov. 160
Plastic clutch cone resists heat (PD) Feb. 157
Plexiglas used to illuminate washer control dial (PD).....Jan. 167
Pre-stressed bar calibrates impact tool (PD) .....Apr. 159
Reshaped housing improves calculator's appearance (PD) .....Dec. 162
Restyling gives mower product identity (PD) .....Dec. 163
Rotor unbalance adjusted by floating bearings (PD) .....Feb. 147
Scanner transmits digital weight signal (PD) .....June 157
Shaft and joint assembly has integral shield (C).....Feb. 224
Spring fingers give positive grip to welding gun (PD) .....June 155
Standard or special (Ed).....Jan. 133
Steam iron—cams set temperature (PD) .....Nov. 161
Stop-motion motor indexes to 1 revolution (PD) .....July 155
Sturdier, more flexible welding gun (PD) .....Feb. 156
Toggle links change linear motion to rotation (PD) .....Dec. 166
Tractor features high torque engine, dual clutch and hydraulic controls (PD) .....July 150
Typewriter — two-section carriage makes even margins (PD).....Nov. 155
Use of mock-ups in design. G. W. Michalec .....Oct. 183
Use of tolerance systems. H. G. Conway .....Feb. 164

Design Engineering Show

Design engineers get their own show Feb. 199
Latest in product development at Design Show .....Apr. 170
Second Annual Get-Together (Ed) Dec. 133
Seen and heard at the Design Engineering Show .....July 206
Top speakers at Design Engineering Conferences .....Mar. 177
A two-way service (Ed).....May 133
Your guide at the Design Engineering Show .....May 169

Differential

Electric push button control and non-slip differential (PD).....Mar. 152

Drafting

Cutting costs on prototypes and small lots. J. W. Reid.....Mar. 169
Simplified drafting—pro and con. D. J. Gerardi .....July 200
Simplified drafting is a supplement. J. H. Bergen.....July 201

Drawing:

Drawing of titanium (A).....Sept. 419
Implied requirements for drawings. Bernhard Rogge .....Feb. 168
Use of tolerance systems. H. G. Conway .....Feb. 164

—E—

Economics

"Watch tariff case"—Defense essentiality: a new investigation (P) June 129

Editorials

Corporations as professionals.....Nov. 133
How much for research?.....Apr. 133
The human side of engineering..Sept. 133
Industry shows the way.....Mar. 133
Innovation or design improvement.Feb. 133
Not Mañana but NOW.....Aug. 133
The open mind contradicts.....Oct. 133
Progress is uphill.....July 133
Second Annual Get-Together....Dec. 133
Solving the shortage problem....June 133
Standard or special .....Jan. 133
A two-way service.....May 133

Education

Demand for more and better instructors in engineering and the sciences at the college level (P).....Sept. 127
Educational requirements for a Nuclear Engineer (P).....Feb. 129
Evaluation of engineering education (A) .....Jan. 354
Germany's amazing comeback. G. F. Nordenholt .....Jan. 135
The human side of engineering (Ed.) Sept. 133
Industry shows the way (Ed)....Mar. 133
Role of technological institutions in the years ahead (A).....June 360

Electronics

Adjustable electronic drive for Fhp shunt motors (C) .....Jan. 222

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.

Application of transistors to electronic counting equipment (A).....Mar. 418
Characteristics of thermally sensitive resistors (A) .....May 374
Electronics and the West.....June 143
Improved electronic circuit breaker (D) .....July 5
Russians catching up in electronics May 191

Electroplating

Acid etching and electroforming precision parts. M. C. Cook.....July 194

Engineering Administration

Corporations as professional (Ed).Nov. 133
Educational requirements for a Nuclear Engineer (P).....Feb. 129
Engineer's greatest achievement (A) June 364
Estimating government contracts. M. J. Phillips .....Jan. 183
Germany's amazing comeback. G. F. Nordenholt .....Jan. 135
Industry looks at the engineering shortage (A) .....May 402
International engineering for a profit. H. A. Toulmin Jr.....Aug. 196
Is the yardstick for estimating individual engineering and scientific potential reliable? (A).....July 349
Management viewed by an engineer (A) .....Feb. 348
Not Mañana but NOW (Ed).....Aug. 133
Progress is uphill (Ed.).....July 133
Project group vs. service group in engineering development. A. H. Kuriloff Aug. 198
Recruiting engineers (P).....July 129
Shortage of government scientists (P) Dec. 129
Solving the shortage problem (Ed) June 133
Value Engineering pays off for the Navy .....Mar. 181
Why register (A) .....June 368

Engines and Engine Control

Bus **engine rolls out** for repair (PD) Aug. 154
Casting crankshafts (D).....May 5
Engine pressure indicators (A)..Mar. 407
Evolution of an engine (PD)....Feb. 150
Fuel injection system (PD).....Sept. 159
Hydraulic unit starts engines faster over wider temperature range (PD) Jan. 168
L. P. G. carburetor injects both liquid and gas (PD) .....Nov. 159
Nodal point engine mounts isolate vibrations (PD) .....Dec. 156
Omega engine—automotive engine changes shape (N).....Apr. 211
Pint-sized gas turbine for light plane use (N) .....June 203

Etching

Acid etching and electroforming precision parts. M. C. Cook.....July 194

Extruding

Aluminum and magnesium extrusions. J. J. DePaolo .....Oct. 200
Electro-hydraulic press control programs extrusion cycle (PD)....Oct. 144
Glass lubricants for extruding metal (D) .....Mar. 5
Review of the heavy press program. John Alico .....Oct. 135

—F—

Fastening

Corrosion resistance of stainless thread inserts in light alloys. P. E. Wolfe Apr. *176
Quick-release fasteners. Mark Levine (MS) .....Aug. 194

Filters

Precision high flow glass bead filter (C) .....Aug. 226

Finishes, Chemical

Chromizing for resistance to corrosion and wear. Lehane & Wachtell..Nov. 180
Colored finishes for copper. A. I. Heim .....Dec. 135
Developments in sprayed metal coatings. H. S. Ingham.....June 194
Hydraulic pressures atomizes paint (PD) .....June 144
Metal coatings for electrical connections. H. B. Gibson.....Nov. 191
Prefinished aluminum. R. V. Vandenberg .....Apr. 135

Finishes, Mechanical

How to measure surface finish inside tubes. C. R. Lewis.....June 190

Finishes, Plastic

Mica-pigmented coating based on silicone resins has heat absorption rating of 96.5 per cent (D) .....Oct. 5
Vinyl laminate. Kiernan & Lombardi July 167

Fittings

Rotating joints. H. S. Kuhn.....Aug. 200

Fluid Mechanics

Calculating damping factors for dashpot dampers .....Apr. 162
Damping factor calculations. B. J. Popper .....Nov. 199
Nomograph for designing gas nozzles and orifices. Eugene Gessner....Oct. 141
Optimum pressure for a hydraulic system. Conrad Cooke .....May 162
Pressure losses in flexible metal tubing. C. M. Daniels (RS).....Apr. 223

Fluids

Changing over to fire-safe hydraulic fluids. C. R. Schmitt.....Nov. 194
Fire resistant hydraulic fluids. R. Q. Sharpe .....Aug. 162
Hydraulic fluids for high temperature systems (A) .....May 420

Forging

Finished-forged gear teeth now used in German autos. O. Rieckhoff..May 180
Getting forging strength in a casting (D) .....Nov. 9
Mechanical properties of large aluminum alloy forgings.....Nov. 166
Review of the heavy press program. John Alico .....Oct. 135

Forming

Forming titanium sheet. R. E. Pitts Feb. 135, Mar. 176
Power spinning conical and tubular parts .....Aug. 135
Prefinished aluminum. R. V. Vandenberg .....Apr. *135

—G—

Gear Drives

Lubrication of high capacity gear drives. Botstiber & Kingston....May 173
Measurement and control of chatter in gear drives. Rose & Hadley..Dec. 168
Minimum inertia in geared drives. M. A. Baer .....Jan. 180
Speed-torque analysis for rotating mechanical systems. V. H. Seliger.Dec. 184

Gears

Expensive steels make cheap gears (A) Oct. 380
Finished-forged gear teeth now used in German autos. O. Rieckhoff..May 180
Load-carrying capacity of spur-gear teeth hob cut from molded du Pont "Zytel" 101 (A).....Aug. 363
Methods of specifying precision of spur gears. G. W. Michalec....Nov. 135
Spring loaded gears hold register for color printing (PD).....Aug. 159
Synchronizing gears minimize backlash (PD) .....Mar. 158
Wear life of aluminum gears. A. H. Maschmeyer .....Sept. 160

Generators

D-C motors and generators (C)..Apr. 228
Variable speed generator-regulator (PD) .....Apr. 154

Germany

Amazing comeback built on education, engineering, energy. G. F. Nordenholt Jan. 135
How the German Standards Bureau serves science and industry. Richard Vieweg .....Feb. 158

Graphical Techniques

Deflections of cantilever beams with changing cross sections. W. R. Leopold (RS) .....July 215
Designing beams for shock and vibration. J. J. Herley Jr. (RS)..Nov. 221
Designing composite members. R. J. Auman .....June 140
Graphical method for shoe brake design. R. O. Kroeger.....Mar. 142
Graphical solutions for two failure theories. Burton Paul.....Mar. 178
Nomograph for designing gas nozzles and orifices. Eugene Gessner....Oct. 141
Rectangular nomographs—four sides to an equation. W. E. Powell.....Mar. 192
Simplified graphical integration. W. L. Vaughan (RS) .....Aug. 223

Grinding

Acheson, Edward Goodrich—100th anniversary .....Apr. 179
All-electric surface grinder with low pressure way lubrication (PD)..Jan. 170
Electro-hydraulic grinder (PD)..Sept. 150
Hydraulically controlled 6-spindle grinder (PD) .....Mar. 160

—H—

Hardening

Flame-pating for wear-resistance.Sept. 202

Human Engineering

Touch and vibration sensitivity. R. J. Fibikar .....Nov. 177

—I—

Instrumentation

Automatic micro-image file (N)..Sept. 208
Automatic miller has simplified programming (N) .....July 203
Digital counters offered in 96 standard models (C) .....Sept. 224
Direct reading optical micrometer (D) Aug. 5
How to measure surface finish inside tubes. C. R. Lewis.....June 190
Magnetic memory system (C)....Nov. 227
Measurement of color and gloss. R. S. Hunter.....Feb. 176
Mechanical comparator (PD).....Apr. *161
Motor driven micrometer (PD)..June 153
Pneumatic comparator (PD).....Apr. *161
Smaller oil pressure measuring system (D) .....Aug. 5

—J—

Joining

Hermetically sealed aluminum-copper connector (N).....Aug. 210
Hidden rivets join tubular parts (PD) Dec. 167
Process prevents corrosion of aluminum bus bar joints (N).....May 205
Sheet metal joints for cylinders and boxes. W. C. Mills (MS).....Oct. 194
Sheet metal seams and joints. W. C. Mills (MS).....Sept. 184

—L—

Legislation

Government adopting policy of user testimony over science in judging advertising claims (P).....Aug. 129

Lubrication

All-electric surface grinder with low pressure way lubrication (PD)..Jan. 170
High capacity gear drives lubrication. Botstiber & Kingston.....May 173
High temperature bearing operation (A) .....Nov. 372
Lubrication of roller chains (MS)..July 192
Power lubrication extends car life (PD) .....Mar. 148
Prelubricated ball bearings use felt pads (N).....May 205
Solid-film lubricants. R. E. Crump Feb. 200

—M—

Machining

Conductive working surface controls cutting machine (N).....Oct. 204
Designing screw machine parts. E. A. Theroux .....June 192
Electrohydraulics in machine tools A. Durr. Pt. II Applications....Jan. 188
Implied requirements for drawings Bernhard Rogge.....Feb. 168
Multiple-function power tool (PD) May 156
Synchronizing gears minimize backlash (PD) .....Mar. 158
Unitized screw machine (PD)....Apr. 151

Magnets

Ceramic magnets. R. A. Scholten Dec. 143
Low cost ceramic permanent magnets (D) .....Apr. 5
Molded, plastic-bound permanent magnets (C).....Apr. 229
Plastic-bound magnets. Gerhard Hennig .....Apr. 182

Materials Handling

Driver-less automatic transfer system (PD) .....May 160
Hoist packaged into compact, low cost unit (PD).....Feb. 154
Hydraulic crane (PD).....Apr. 148
Manipulator redesigned for production (PD).....June 150

Mathematics

Column formulas—four basic types. G. H. Howell.....Apr. 139
Conversions in English and metric systems. H. A. Magnus (RS)...Oct. 215
Curve fitting with orthogonal polynominals. C. R. Sexton.....Apr. 171
Detecting symmetric switching functions. M. P. Marcus.....Nov. 164
Slope reader for data reduction (C) .....Feb. 225

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.

Surface curvature. Ernest Wildhaber .....May 184
Volume of spherical sements. Richard Angelari (RS) .....Nov. 225

Metals, Ferrous

Chromizing for resistance to corrosion and wear. Lehane & Wachtell..Nov. 180
Cold work effects on three types of stainless (A) .....Sept. 420
Compensating for thermal expansion. P. T. Kaestner.....Mar. 162
Constant modulus alloy, Ni-Span C, for elastic elements. Marshall Ward .....July 135
Corrosion resistance of stainless thread inserts in light alloys. P. E. Wolfe .....Apr. 176
Cracking of welded low-alloy steels Aug. 185
Effect of residual strength on the strength of steel (D).....Jan. 5
Expensive steels make cheap gears (A) Oct. 380
Hard surfacing of stainless steel parts (D) .....Dec. 9
High-strength steel cellular-core sandwich plates (A).....Nov. 368
High strength steel key factor in design of world's largest shovel (PD) May 148
High temperature materials—a review. E. A. Brandes.....Sept. 186
Limitations of steel specifications (A) Mar. 397
Metals at elevated temperatures. R. W. Guard .....Oct. 160
New nickel-free stainless. E. J. Whittenberger & others.....Dec. 151
Ni-Span C unaffected by severe temperature change (D).....Feb. 5
Predesigning alloys (D).....Aug. 5
Real oil-less, self-lubricating bearing metal (D) .....Dec. 9
Report of four precipitation-hardening stainless steels.....Nov. 204
Selecting brazing alloys. R. A. Long Sept. 191
Selection guide for steels. Dominic Mascio (RS) .....Dec. 211
Self-fluxing brazing alloys for ferrous metals .....Jan. 204
Spring materials for high temperature service .....Aug. 186
Stainless steel for corrosion resistant service (A) .....Aug. 370
Stainless steel threads cast in cast iron (D) .....Oct. 5
Stress-corrosion of 18-8 (A).....Aug. 367
Substitute high temperature alloys for jet engine use (D).....Jan. 5
Thermal expansion coefficients for 51 metals. W. A. Tucker (RS).....Mar. 215
Two new high temperature alloys (D) July 5

Metals, Nonferrous

All aluminum transport (PD).....Feb. 152
Aluminum and magnesium extrusions. J. J. De Paolo.....Oct. 200
Chemical milling of mangesium (D) Feb. 5
Chromizing for resistance to corrosion and wear. Lehane & Wachtell..Nov. 180
Compensating for thermal expansion. P. T. Kaestner..... Mar. 162
Corrosion resistance of titanium. A. N. Eshman .....June 187
Drawing of titanium (A).....Sept. 419
Flame cutting for nonferrous metals. R. M. Gage.....Feb. 170
Forming titanium sheet. R. E. Pitts. Feb. 135, Mar. 176
High temperature materials—a review. E. A. Brandes.....Sept. 186
High temperature strain gage materials (D) .....Feb. 5
Magnesium-thorium alloy .....Nov. 200
Magnesium truck light and rigid (PD) .....Feb. 152
Manganese-copper high-damping alloys. Jensen & Rowland Jr.....May
Mechanical properties of large aluminum alloy forgings.....Nov. 166
Mechanical properties of wrought phosphor bronze alloys (A).....Sept. 416
Metal coatings for electrical connections. H. B. Gibson.....Nov. 191
Metal strip inflated into tubes (N) Mar. 202
Metals at elevated temperatures. R. W. Guard .....Oct. 160
New structural index (A).....July 344
Plastic behavior of aluminum alloys (A) .....Sept. 412
Predesigning alloys (D).....Aug. 5
Prefinished aluminum. R. V. Vandenberg .....Apr. *135
Properties of R. C. 130A sheet titanium (A) .....Oct. 376
Properties of Ti 75A sheet (A)...Nov. 363
Real oil-less, self-lubricating bearing metal (D) .....Dec. 9
Resistance to corrosion of Al-Cu and Al-Cu-Cd alloys (A).....Oct. 280
Resistance to corrosion of sheet Mg-Li alloys (A).....Oct. 376
Rigidized tube-in-strip (C).....May 222
Selecting brazing alloys. R. A. Long Sept. 191
Silver brazing. A. W. Swift.....Mar. 135
Silver brazing alloys in expanded strip form (C) .....Aug. 227
Spring materials for high temperature service .....Aug. 186
Thermal expansion coefficients for 51 metals. W. A. Tucker (RS).....Mar. 215
Two new high temperature alloys (D) July 5
Vaporized metal on synthetic fibers (D) .....Mar. 5

Meters

All-transistor vibration meter (PD) May 161
Smaller oil pressure measuring system (D) .....Aug. 5

Molding

Precision molding technique with epoxy resins (N).....June 206

Motors

Adjustable electronic drive for Fhp shunt motors (C).....Jan. 222
Applying single-phase capacitor-start motors. J. D. Aubry.....Oct. 196
Battery-operated timing motor uses clock movement (C).....Dec. 216
Commutatorless direct current motor (A) .....Mar. 389
D-c motors and generators (C)...Apr. 228
Disc brake for fluid coupling motor (C) .....June 222
Driving high-inertia loads C. C. Libby Apr. 142
Fan cooling—influence of altitude. J. Constant van Rijn.....June 198
Fractional horsepower motors. Sidney Davis (MS) .....Jan. 198
Hydraulic coupling for fhp motors (C) .....July 220
Motors . . . for direct-connected fans. R. F. Fricke.....May 194
New NEMA standards for d-c motors and generators (A).....Jan. 329
Pump motor uses gasoline as both coolant and lubricant (PD)....Mar. 155
Push buttons control vacuum-operated dampers (PD) .....Dec. 157
Rectangular electric motors—140-in.-oz output (C).....May 223
Residual voltage in induction motors (A) .....Apr. 390
Selecting motors for fans and centrifugal pumps. C. G. Veinott (RS)..May 217
Self-powered electric wheel (C)..Mar. 220
Single-phase motors start on low current (C) .....Oct. 220
Single-stage torque converter for heavy equipment (C) .....May 222
Starting methods for three-phase motors. Cory & Ballinger.....Feb. 183
Stop-motion motor indexes to 1 revolution (PD) .....July 155

Motors, Hydraulic

Hydraulic unit starts engines faster over wider temperature range (PD) Jan. 168
Industrial rotating hydraulic drives (A) .....Jan. 359

— N —

Noise

Apparatus noise measurement (A) Jan. 349
Noise control. Smith Jr. & Junger Nov. 143

— P —

Patents

Consent decrees and patents (P) Apr. 129
International engineering for a profit. H. A. Toulmin Jr.....Aug. 196

Personnel

Dangers ahead for the engineering profession (A) .....Feb. 326
Industrial designer and the engineer (P) .....Oct. 129
Industry shows the way (Ed)....Mar. 133
Simple suggestions concerning the shortage of engineers. A. M. Cooper Oct. 158

Photography

Analysis of oscillatory motion using high speed photography. W. G. Hyzer .....June 135
Attachment makes diazo duplicates of microfilm (C).....Mar. 221
Camera stand—low-friction, no-play mechanisms maintain precision (PD) Jan. 164
High speed cameras have interchangeable motors (N).....June 202
Neg'ator spring motor in camera (PD) Mar. 161
Photo-cell resets camera iris (PD) Oct. 155
Photographing heat (N).....Apr. 214

Plastics

Corrosion of metals by plastics (D) Sept. 5
General properties of the new superpolyethylenes (A) .....May 424
How to choose tough, rigid thermoplastics. Multer & Irvin.....Nov. 167
Load-carrying capacity of spur-gear teeth hob cut from molded du Pont "Zytel" 101 (A).....Aug. 363
Long-term strengths of reinforced epoxy pipe (A).....June 346
Molded, plastic-bound permanent magnets (C) .....Apr. 229
Mylar . . . a high-strength film. D. D. Lanning.....July 187
Nylon boat propeller (D).....Apr. 5
Plane fueling cart has plastic body (PD) .....Oct. 157
Plastic-bound magnets. Gerhard Hennig. .....Apr. 182
Plastic clutch cone resists heat (PD) Feb. 157
Plastic springs. Reinhart & Newman June 183
Plastics for structural uses.....June 167
Quality of glass fiber reinforced plastics (D) .....Sept. 5
Reinforced plastic makes rigid truck grill (PD) .....Dec. 160
Resins for reinforced plastics. Ernest Schlieben .....May 198
Stretched plastics for crack resistance. Edward Schiff.....Aug. 204
Stressed-plastic panels reduce trailer weight (PD) .....Sept. 153
Two-color molded plastic parts (D) Apr. 5
Plexiglas used to illuminate washer control dial (PD).....Jan. 167
Reinforced plastics from cellulose fibers (A) .....Jan. 360
Screw-holding power of polyester laminates. R. R. Dixon (RS).....June 217
Small plastic springs (D).....Mar. 5
Vinyl laminate. Kiernan & Lombardi July 167

Plating

Flame-plating for wear-resistance Sept. 202
Flame-plating gun .....Apr. 170
Metal coatings for electrical connections. H. B. Gibson.....Nov. 191

Pneumatics

Nomograph for designing gas nozzles and orifices. Eugene Gessner.... Oct. 141
Pneumatic comparator (PD).....Apr. *161
Pneumatic-hydraulic cylinder positioners (A).....Feb. 330
Pneumatic time-delay relays Carl Lindahl .....Jan. 174

Printed Circuits

Printed circuits with self-sticking tape (C) .....June 223
Printed wiring for industrial service Aug. 167

Presses

Review of the heavy press program. John Alico .....Oct. 135

Product Development

Cutting costs on prototypes and small lots. J. W. Reid.....Mar. 169
How to improve profits—a challenge to engineering (A).....May 414
Industrial product design (A)....Feb. 332
Latest in product development at Design Show .....Apr. 170
Metal strip inflated into tubes (N) Mar. 202
Nonprofit qualifying agency for materials suggested .....Apr. 147
Russians catching up in electronics May 191

Professional Trends

Corporations as professionals (Ed) Nov. 133
Practice of engineering by corporations (A) .....May 374
Recruiting engineers (P).....July 129

Pumps

Cams sequence pump motions (PD) Oct. 154
Fluid seals packing-less pump (PD) Aug. 158
Oil reservoir design symposium..Mar. 166
Pump motor uses gasoline as both coolant and lubricant (PD).....Mar. 155

— R —

Relays

Development of a wire contact relay (A) .....Jan. 340
Improved electronic circuit breaker (D) .....July 5
Mercury plunger relays. J. D. Flamm Mar. 182

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.

Plug-in starter relays all use same basic parts (C).....Nov. 226
Pneumatic time-delay relays. Carl Lindahl .....Jan. 174
Simplifying relay control circuits..Nov. 162

Research

General Motors Corp.'s new Technical Center (N) .....July 212
How much for research? (ED)...Apr. 133
Library panel speeds information (A) Jan. 340
Research in the library. Allen Kent Dec. 149

Rheostats

Mechanical problems in miniaturizing potentiometers. E. D. Drewitz..Aug. 141

Rubber

Silicone rubber . . . properties, forming, applications. S. K. Moxness Mar. 173

—S—

Safety

Changing over to fire-safe hydraulic fluids. C. R. Schmitt.....Nov. 194
Fire resistant hydraulic fluids. R. Q. Sharpe .....Aug. 162

Sans, Soucl

Ad libbing by the Editor.....Jan. 326
Feb. 316, Mar. 384, Apr. 382, May 366
June, 342, July 332, Aug. 358, Sept. 406
Oct. 369, Nov. 354, Dec. 332

Seals

Fluid seals packing-less pump (PD) Aug. 158
Friction characteristics for hydraulic seals. R. W Carlson (RS).....May 221
High temperature seals—o-ring and gland design. T. J. McCuistion..Jan. 151
Rotating seals for high pressure. H. F. Greiner .....Feb. 140

Soldering

ASTM Symposium on solder (A)..Aug. 369

Springs

Constant modulus springs stabilize mass flowmeter (PD).....Oct. 156
Designing springs for performance. W. E. Froehlich.....Sept. 135
High temperature creep of coil springs. C. T. Eakin.....Nov. 186
Neg'ator spring motor in camera (PD) Mar. 161
Plastic springs. Reinhart & Newman June 183
Small plastic springs (D).....Mar. 5
17 ways of testing springs. C. J. McClintock (MS) .....Feb. 174
Spring materials for high temperature service .....Aug. 186
Vibration pickup uses "C" springs (PD) .....Apr. *160

Standardization

How the German Standards Bureau serves science and industry. Richard Vieweg .....Feb. 158
Limits and fits. H. G. Conway (RS) Sept. 219
New NEMA standards for d-c motors and generators (A).....Jan. 329
Preferred limits and fits (A)....July 350
Surface standards (A).....Sept. 411
Use of tolerance systems. H. G. Conway .....Feb. 164

Stress Analysis

Applicability of notch tensile test data (A) .....Mar. 415
Compressive and torsional buckling of thin-wall cylinders in yield region (A) .....Dec. 349
Designing composite members. R. J. Auman .....June 140
Designing strain gage circuits for sensitivity and linearity. P. K. Stein .....July 144
Effect of residual stress on the strength of steel (D).....Jan. 5
Fatigue . . . what we do and don't know about it (A).....Apr. 414
Graphical solutions for two failure theories. Burton Paul.....Mar. 178
High temperature creep of coil springs. C. T. Eakin.....Nov. 186
Information of the distribution of stresses (D) .....Sept. 5
Long-time creep rupture behavior (A) .....Sept. 411
New stress analysis technique (D) June 5
New structural index (A).....July 344
Photostress. Zandman & Wood...Sept. 167
Strain gage balancing simplifies multiple-bridge measurements. P. K. Stein .....June 161
Strain-gage bridge sensitivity control. P. K. Stein.....Jan. 200
Strain gage transducers. P. K. Stein Mar. 196
Stress hardness relation (A).....Dec. 345
Stresses in perforated panels. Dally & Durelli .....Mar. 188

Switches

Detecting symmetric switching functions. M. P. Marcus.....Nov. 164

—T—

Testing

Apparatus noise measurement (A) Jan. 349
Balancer operates to 200,000 rpm (PD) June 148
Constant velocity universal joint permits packaged test facility (PD) Jan. 167
Creep tester makes three basic tests (PD) .....July 162
Guided missile control systems testing. D. E. Mullen.....Mar. 199
Hot hardness tester (PD).....Aug. 158
Non-destructive testing of resistors (D) Dec. 9
Portable metal hardness tester (D) May 5
Ruggedized, waterproof test sets (D) Nov. 9
17 ways of testing springs. C. J. McClintock (MS) .....Feb. 174
Supersonic parachutes get underwater tests (N) .....Aug. 207
Testing dynamically loaded bearings (A) .....Dec. 345
Torque tester uses hysteresis brake (PD) .....June 152
Variables in humidity testing. T. J. Cartin .....Aug. 160

Textile

High-speed weaving machine (PD) Sept. 146
Vaporized metal on synthetic fibers (D) .....Mar. 5

Timers

Battery-operated timing motor uses clock movement (C).....Dec. 216
Modular design timer (C).....Dec. 217

Transistors

All-transistor vibration meter (PD) May 161
Application of transistors to electronic counting equipment (A).....Mar. 418
Transistors—future, uses, what users say, manufacture, production (D) Mar. 129
Transistors made easier (N)....Feb. 207

Transmissions, Hydraulic

Lift truck has sectional transmission (PD) .....May 156

Transmissions, Mechanical

Automatic clutch transmission (C) Aug. 227
duced, power braking improved (PD)
Transmission friction elements re- Mar. 150

—V—

Valves

Calculating time lag of hydraulic and pneumatic valves. Louis Dodge June 158
Hydraulic control valves I—Relief valves. J. J. Pippenger.....Dec. 174
Tracer valve controls milling machine (PD) .....Aug. 156

Variable Speed Drives

Speed control for Fhp drives (C) Oct. 221

Vibration and Shock

Air cushion supports rear springs (PD) .....Dec. 158
Air-filled suspension system ready for 1956 trucks (N).....Feb. 206
Designing beams for shock and vibration. J. J. Herley Jr. (RS)....Nov. 221
Hydraulic clutch and ball joint suspension in English car (PD).....Nov. 156
Measurement and control of chatter in gear drives. Rose & Hadley..Dec. 168
Nodal point engine mounts isolate vibrations (PD) .....Dec. 156
Noise control. Smith Jr. & Junger Nov. 143
Plastic behavior of aluminum alloys (A) .....Sept. 412
Pneumatic springing (PD).....Mar. 156
Random motion. G. B. Booth....Nov. 169
Rubber isolation decreases shocks transmitted to frame (PD).....Nov. 152
Touch and vibration sensitivity. R. J. Fibikar .....Nov. 177
Vibration pickup uses "C" springs (PD) .....Apr. 160
Wheel suspension has fewer parts, less weight (PD) .....Dec. 159

Voltage Regulators

Starting methods for three-phase motors. Cory & Ballinger.....Feb. 183

—W—

Welding

Aluminum joint corrosion is avoided (D) .....May 5
Bellows is redesigned for welding (PD) Dec. 161
Cracking of welded low-alloy steels Aug. 155
Spring fingers give positive grip to welding gun (PD).....June 155
Sturdier, more flexible welding gun (PD) .....Feb. 156
Papers from AWS National Spring Meeting, Buffalo, N. Y. (A)....Oct. 384

(A) Abstract. (C) New Components. (D) Developments. (Ed) Editorial. (MS) Mechanical Spread.
(N) Technical News. (P) Perspective. (PD) Product Design. (RS) Reference Book Sheets.

AUTHORS' INDEX

STEIN, Peter K.—Designing strain gage circuits for sensitivity and linearity July 144
Strain gage balancing simplifies multiple-bridge measurements .....June 161
Strain-gage bridge sensitivity control Jan. 200
Strain gage transducers.....Mar. 196
STEWART, H. L. & J. M. Moritz—Functional design of hydraulic systems July 171
STRASSER, Federico—Electrical terminal connections .....Dec. 182
SWIFT, A. W.—Silver brazing.....Mar. 138

THEROUX, Earl A.—Designing screw machine parts .....June 192
TOMPKINS, R. E. & R. F. Edgar—Fast acting magnetic clutch.....Aug. 145
TOULMIN, H. A. Jr.—International engineering for a profit.....Aug. 196
TRAVIS, R. I.—Time clock frame..Feb. 163
TUCKER, W. A.—Thermal expansion coefficients for 51 metals.....Mar. 215

VAN RIJN, J. Constant—Fan cooling—influence of altitude .....June 198
VANDENBERG, R. V. — Prefinished aluminum .....Apr. 135
VAUGHAN, W. L.—Simplified graphical integration .....Aug. 223
VEINOTT, C. G.—Selecting motors for fans and centrifugal pumps....May 217
VIEWEG, Richard—How the German Standards Bureau serves science and industry .....Feb. 158

WACHTELL, R. L. & D. E. Lehane—Chromizing for resistance to corrosion and wear.....Nov. 180
WARD, Marshall—Constant modulus alloy for elastic elements.....July 135
WASKO, Bernard—Bead chains for light service .....May 192
WENIG, H. G. & S. S. Linn—Centrifugal pendulum design .....July 164
WHITTENBERGER, E. J. & others—New nickel-free stainless.....Dec. 151
WILCOCK, D. F. & E. R. Booser—Why bearings fail.....Oct. 167
WILDHABER, Ernest—Surface curvature .....May 184
WITCHEY, R. H. & others—New nickel-free stainless .....Dec. 151
WOLFE, Paul E.—Corrosion resistance of stainless thread inserts in light alloys .....Apr. *176
WOOD, M. R. & Dr. F. Zandman—Photostress .....Sept. 167

ZANDMAN, Dr. F. & M. R. Wood—Photostress .....Sept. 167

EDITORIAL CONTENT
for Design Digest Issue

— A —

Interpretation of Fracture Patterns by Charles Lipson....A2
Numerical Machine Tool Control by L. W. Herchenroeder....A7
Effective Report Writing by Ralph A. Richardson and C. A. Brown....A10
Types and Uses of Nuclear Reactors....A12
Characteristics of the Large-Scale Calculators by John W. Carr III and Alan J. Perlis....A16
Characteristics of the Small Computers by John W. Carr III and Alan J. Perlis....A18
Nondestructive Testing....A20a
Research and Development Stockroom—Organization and Management by Leo Rosen....A21
New Books....58

— B —

Air Cooled and Oil Quenched Pearlitic Malleable Irons by John E. Kruse....B2
Wrought Alloys for Jet Engine Bucker Application by Stephen G. Demirjian....B6
Alloys for High Temperature Applications....B8
Irradiation Effects on Metals....B10
Selection Charts for Investment Casting Alloys by D. V. Ludwig and R. L. Wood....B14
Fatigue Properties of Wrought Phosphor Bronze Alloys by G. R. Gohn, J. P. Guerard and H. S. Freynik....B17
Boron-Modified Cobalt-Base S-816 Alloy by W. E. Blatz, E. E. Reynolds and W. W. Dyrkacz....B20
Magnesium Plaster Mold Castings by E. J. Willis....B22
Nomenclature for Magnesium Base Alloys....B23
Factors Affecting Aluminum Alloy Selection by J. R. Willard and R. R. Cope....B26
New Books....A40

— C —

Effect of Chronium Plating on Fatigue Strength of Steel by C. Williams and R. A. F. Hammond....C2
Corrosion: Types and Prevention by C. L. Hibert....C6
Industrial Applications of Ceramics by E. J. Smoke and J. H. Koenig....C12
Transparent Plastic Part Design by Alfred M. Blumenfeld....C16
Color Coating for Plastics by Lloyd E. Parks....C18
Creep of Reinforced Plastics by Harry R. Sheppard, Jr. and Earl H. Van Antwerp....C22
Selection of Proper Plastic Material by J. Harry DuBois....C26
New Books....B54

— D —

Weldability of Titanium Alloy by H. L. Meredith and C. W. Handova....D2
Recommended Welding Processes by John J. Chyle....D6
Welding of Stainless Steels by Helmut Thielsch....D7
Designing Parts to Reduce Waste by W. M. Halliday....D10
Zero Draft Angle Forging Technique by James A. Horn....D12
Steel Extrusions Using Glass Lubrication....D15
Fabrication of Clad Steels by Henry F. Peters....D18
Form Rolling of External Threads by C. T. Appleton....D20
Product Standards for Die Castings....D24
New Books....C70

— E —

Causes of Sleeve Bearing Failures by Anthony F. Kaminskas....E2
Bearing Loads on Geared Shafts by Zbigniew Jania....E6
Short Cuts That Speed Solutions of Gear Design Problems by Nigel Akerman....E8
Fine Pitch Precision Spur Gears for Driving Small Units by R. M. Gitlin....E9
Serrated Clutches and Detents by L. N. Canick....E12
Engineering Standards for Multiple V-Belt Drives....E14
Ten Types of Belt Drives by George R. Lederer....E20
Methods for Reducing Pulsation in Chain Drives by Eugene I. Radzimovsky....E22
Friction Devices for Intermittent Rotary Motion by W. M. Halliday....E24
New Books....D74

— F —

Frictional Characteristics of Plastics by W. C. Milz and L. B. Sargent, Jr. F2
Double Helical Steel Springs by Victor Tatarinov F6
Long Helical Spring Behavior Under Fluctuating Load by C. L. Staugaitis and H. C. Burnett F9
Seals for Mechanical Components by J. W. Pennington, T. C. Kuchler and E. J. Taschenberg F12
Stress Equations for Strain Gage Rosettes by C. C. Perry and H. R. Lissner F19
Evaluating Pythagorean Equations by Ernest L. Schlage F22
Effects of Residual Stresses in Cold-Finished Steel Bars by E. S. Nachtman F24
Design of Castings to Reduce Production Costs F28
Selecting Vibration Isolators by Russell Lowe F30
Shifter Designs for Sliding Components by Fred Rogers F32
Nomogram for Parabolic Cam with Radially Moving Follower by Rudolph Gruenberg F35
How to Reduce Bending and Twisting of Machine Structural Elements by Omer Blodgett F36
Balancing Pivoted Parts Subject to Impact Forces by Burton Paul and Melvin Zaid F40
WR^2 of Round Steel Bars F42
Comparison of Vessel Design Theories by R. W. Schneider F43
Nomograms for Pressure Vessel Design by C. J. Major F44
Section Moduli of Pipes, Tubes and Shafts by James J. Kerley, Jr. F48
Design of Round Tubes for Combined Bending and Torsion by Robert A. Needham F49
New Books E90

— G —

Brazing Alloys with Lithium Additions by N. Bredz and D. Canonico G2
Types of Patented Locking Fasteners G6a
Nomograms for End Play of Acme Screw Threads by D. Sweet G7
Joint Design for Adhesive Bonding by Richard S. Piper G10
Simplifying Assemblies with Spring-Steel Fasteners G14
Holding Power of Press Fits by Richard Hazelett G16
Increasing Bolt Impact Strength by Optimum Area Design by J. A. Love, Jr. and O. A. Pringle G18
Coordinates for Holes on Bolt Circles by George A. Nelson G22
New Books F90

— H —

Comparison of Internal Combustion Engines H2
Supercharging of Internal Combustion Engines H6
NEMA Standards for D-C Motors and Generators by J. F. Davis H10
Types and Uses of D-C Motors and Controllers H14
Electro-Mechanical Control Systems by Sidney Davis H18
Applications of Differential Winch to Control Systems by Alexander B. Hulse, Jr. and Robert Aymar H24
New Books G70

— I —

Magnetic Amplifiers in Heavy-Duty Systems by Ulrik Krabbe 12
Switches for Miniature and Transistorized Equipments by George C. Jakubowski 16
Basic Timer Components and Their Characteristics by J. E. Graham 19
Packaged Electrical and Electronic Components by Barney J. O'Neill 119
Applications for Permanent Magnets 124
Fundamental Types of Permanent Magnets 126
Printed Circuits for Electrical Equipment by Donald E. Gray, Jr. 128
Power Transformer Design Charts by Reuben Lee and N. E. Mullinix 132
Photoelectric Controls 134
New Books H66

— J —

Liquid Proportioning by Volumetric Devices by Lawrence Lowy J2
Reynolds Number Chart by George Loweke J7
Design of Pneumatic Relay Circuits by Robert D. Cowherd J8
Quick Disconnects and Self-Sealing Couplings for Fluid Applications J12
Gaskets for Raised Face Flanges J14
Fundamentals of Pneumatic Control by R. Cooper J18
Nomograms Relating Hydraulic, Pneumatic and Electrical Energy by A. E. Maine J22
Piston Travel Time Chart J25
Types of Hydraulic Accumulators by A. F. Welsh J26
Theoretical Capacity of Gear Pumps and Motors by A. E. Maine J29
New Books 1104
